FRONTEND WEB DEVELOPER

Skilled and detail-oriented Frontend Developer with 2 years of hands-on experience in building responsive and user-friendly web interfaces. Proficient in HTML, CSS, JavaScript, and React.js, with a strong understanding of modern frontend development practices and UI/UX principles. Adept at translating design mockups into clean, maintainable code and collaborating with cross-functional teams to deliver high-quality web applications.

TECHNICAL SKILLS

Language: HTML, CSS, JavaScript, Typescript, SASS(SCSS)

Framework: React.js, Next.js

Libraries : Tailwind CSS, Redux JS Toolkit, Axios

Tools: Visual Studio Code, Git npm

PROFESSIONAL EXPERIENCE

Astria Digital Private Ltd,
React.js Developer

Aug 2024 - Present

Delivered advanced customer service management solutions using React, focusing on enhancing user experience and operational efficiency through modern front-end technologies and component-driven development.

Accomplishments

- Improved user interfaces and application performance, resulting in a more engaging and efficient user experience.
- Implemented effective state management and data handling strategies, significantly boosting data accuracy and application responsiveness.
- Identified and implemented optimizations that improved application performance and reduced load times, enhancing overall user satisfaction.
- Developed a feature that allows users to link their Google Business accounts with the Spio portal, allowing them to manage and respond to reviews, either manually or using AI.

Apyrn Labs Private Ltd,
Software Engineer

Mar 2023 - Mar 2024

Experienced in developing dynamic and interactive web applications using React.js, with strong proficiency in managing application state and optimizing performance for seamless user experiences.

Accomplishments

- Successfully developed and optimized interactive web applications, enhancing user experience and performance
- Implemented and managed application state effectively, ensuring consistent and efficient data handling across projects.
- Designed and deployed blockchain solutions, contributing to secure and transparent digital transactions.
- Improved code quality and application maintainability through rigorous testing and best practices in development.

PROJECTS

SPIO Review Portal
React.js,MUI and Tailwind Css

Astria Digital Private Ltd,
Bangalore

Built and maintained a customer service portal using React.js, featuring Google integration to allow businesses to manage and respond to reviews manually or with AI assistance. Also developed a Wi-Fi control interface enabling real-time management of connected users, bandwidth allocation, and access limits.

Accomplishments

- Implemented advanced dashboard features to display the number of reviews and ratings in a clear and interactive format
- Developed analytics charts to display location-wise data, showing separated locations with corresponding reviews and ratings for each.
- Enhanced analytics charts to display response time differences between clients and users, alongside location-specific reviews and ratings.

Inventory Management
React.js and Typescript

APYRN Labs Private Ltd,
Coimbatore

Developed an inventory management and invoicing system that tracks all inventory activities and generates billing for services and products.Implemented an EMI option for high-value, regular clients with payment plans of up to one year, and integrated a data table to display product quantities, pricing, and detailed billing information.

Accomplishments

- Ensured complete tracking of inventory orders, sales, and deliveries across multiple customers and vendors, improving operational transparency and efficiency.
- Enabled real-time tracking of inventory levels, locations, and reorder timing, along with support for credit-based sales and purchases.
- "Provided detailed reports for analyzing sales operations, helping sales teams identify patterns and insights to improve product and service quality.

EDUCATION

Adhiyamaan College of Engineering
B.E.Mechanical Engineering

Aug 2015 - Apr 2019
